CAUTION

This product contains ingredients which may cause skin irritation on certain individuals and a preliminary test according to accompanying directions should first be made. This product must not be used for dyeing the eyelashes or eyebrows, to do so may cause blindness. Do not apply if skin is irritated or injured. In case of eye contact, wash with water, keep out of reach of children. Wear a towel to protect clothing. Avoid apply on clothes or any other surface, permanent staining may occur. On skin, rinse with cool water.

ALLERGY TEST

With mild soap and water, wash an area the size of a quarter at the inside bend of your elbow. Let it dry. Use a cotton swab or tissue to apply a small amount of product from the hair fiber re-pigmentation gel tube. Examine test area at 24 and 48 hour later. If no reactions occur you can proceed to color your hair. In case you see reddening or feel burning or other irritation, wash the area immediately and do not use 4 steps or any permanent haircoloring.

A USE INSTRUCTIONS

PREPARATION

1

PUT ON THE GLOVES.
COVER YOUR CLOTHES
WITH A TOWEL TO AVOID
UNDESIRED STAINS.

2

THIS PRODUCT COMES
READY TO USE

B APPLICATION

If you would like to shampoo your hair before the application of the product, do not use conditioner and dry it very well with a towel.

1. Apply some of the hair fiber re-pigmentation gel with a comb or with your fingers onto your dry hair. 
2. Do not use conditioner and dry it very well with a towel. Spread the gel on the zone you wish to repigment (grays, sideburns or on all the hair). Once the application is finished, close the tube immediately for reapplications or touch ups.
3. Leave it on your hair for 5 minutes. If you have resistant grays leave the product on between 10 to 20 minutes. While you wait, you can wash your gloves for the next time.

C RINSE

1. Rinse with plenty of water.
2. Do not shampoo hair.
3. You may shampoo after 24 hours (not immediately after application). 

QUANTITY OF APPLICATIONS

The product can be used as often as required until the desired color-depth has been reached. This may happen even after the first application if your color is blonde or if you only want to hide your grays. The quantity of applications will depend on the intensity of the color you want to reach.

DEVELOPMENT TIME

The exposure time is 5 minutes. For a lot of grays or resistant tones we suggest to increase the exposure time till a maximum of 20 minutes. Once the product is applied and rinse, the results will be hardly visible. The formula will gradually act in the next 72 hours, after that you will have to repeat the applications every 3 to 7 days. It is very important to wait at least 3 days before making the following application. The results will not speed up if you apply more quantity of product if you apply it more often. If you achieve your color before the fourth application you may interrupt its use.

- REMEMBER:
- If you want a lighter color you will reach it before than if you want a darker shade.
 - If your hair is thin and has a small quantity of grays you will be reaching the color before if your hair is thick and with a lot of gray or resistant ones.
