

PREPARATION:

Mix the content Haircolor Cream EstereoColor with 1,66 Oz. of Cream Developer EstereoColor, in a non-metallic bowl until mixture is completely blended. Use immediately and discard the leftovers.

APPLICATION:

Apply over dry, unwashed hair, wearing gloves.

- Non-dyed hair: Apply the mixture first over hair length and ends and wait 15-20 minutes. Then apply over roots for an additional 20 minute period. In order to distribute the color evenly, apply a gentle massage all over the hair's surface.
- Grown-out roots: Apply the mixture over roots and wait between 20 to 25 minutes. Then spread over the rest of the hair and wait a further 15 minute period.

ENJUAGUE Y LAVADO:

Once the periods indicated for each case are finished, hair should be rinsed with plenty of water until this is clean. You may wash hair quickly with shampoo and rinse. Then apply final post-coloring treatment.

HELPFUL HINTS:

- If you have recently permed or relaxed your hair, wait at least one week before coloring and reduce development time by 5-10 minutes. Results may be either lighter or more intense than expected. You should also take into account that perming always causes fading.
- If you have thick hair: leave color on for 5 to 10 more minutes.
- If you have thin, weak or damaged hair:
 - For first-time application: apply on sideburns and forehead last, because these areas get colored easier than the rest.
 - For re-touch application: start by applying mixture to the roots. After the development time is over, spread the remaining mixture throughout the rest of the hair and leave on for only 5 minutes.
- To remove any traces on skin, simply wipe with cotton wool moistened with water and shampoo or water and soap.

PRECAUTIONS:

*Do not use on eyelashes or eyebrows. Wear the gloves.
Use a plastic cape or towel to protect clothing.
Do not use metal bowls or utensils.
Never use on irritated or cut skin before it is healed.
It contains Ammonia, Phenylenediamines, Diaminophenols, Resorcinol and/or Alpha-Naphthol. Contains Hydrogen Peroxide.
Rinse hair well after use.
If product comes into contact with eyes, wash out immediately with plenty of water.
It may cause allergic reactions: do allergy test (clean with alcohol the back of the forearm and apply a small quantity of the product. Let it dry and rinse. If after 24 hours there is no itching or reddening, you may use the product). KEEP OUT OF REACH OF CHILDREN.*
