

RED BOOSTER

1) PREPARATION

Wear plastic gloves.

If you have purchased an individual coloration, pour in a bowl the dye, developer cream and content of Algaline Red Booster (3ml) and blend until you get a uniform mixture.

If you have purchased a KIT coloration, pour the content of Algaline Red Booster (3ml) in the applicator bottle with the dye and developer cream. Close tight the applicator and shake until you get a homogenous mixture. Use an ampoule every 100 to 150 gr of final mixture.

2) APPLICATION

Apply immediately the coloration on the hair according to the instructions of the selected dye. Protect your clothing and other elements from possible stains putting a no longer used hood or towel on your shoulders.

3) RINSE

Once the exposition time recommended for the dye is over, rinse with abundant water until it comes transparent. Apply shampoo or rinse according to the indications of the coloration used.
